

## **QUALITY, ENVIRONMENTAL, AND H & S POLICY**

The company is engaged in the design, installation and maintenance of electrical and mechanical systems. Our main objective is to meet customer and regulatory requirements whilst controlling and preventing pollution, and minimizing the risks to personnel, through the efficient provision of service using the most up to date equipment and technology available.

We will maintain adherence to relevant environmental, OH&S and other legislation relating to the activities carried out and will maintain dialogue with the respective authorities in this regard. Our aim will be to strive for continual improvement through the review of our quality, environmental, and OH&S objectives and targets, and purposeful evaluation of our processes to prevent pollution, to minimize risks and to prevent injury and ill health to all personnel working for or on behalf of the company. We are committed to complying with customer, statutory and regulatory requirements, and will continually improve the effectiveness of the integrated management system. The system will be reviewed at appropriate intervals, which will provide the framework for the setting and review of quality, environmental, and OH&S objectives, and targets.

We aim to offer the most competitive, professional, and efficient service consistent with costs, and to ensure that the company's organisational goals and objectives are met in line with the customer's needs and expectations. We recognise the implications of the requirements as specified in the various regulations to which we operate, we will ensure that the operations carried out comply with the above.

To meet the requirements of the above regulations, and the needs and expectations of our customers in a cost-effective manner, the company will operate a system dedicated to the "Right First Time Approach". It is a prime requirement of our approach to quality, environmental, and OH&S issues that each person recognises and adopts the company philosophy and accepts the responsibility for the quality of his/her own output, and the risks to others working for or on behalf the company. To facilitate and ensure such success, our system of operation has been defined in the system manual and its supporting procedures, compiled around the requirements of BS EN ISO 9001: 2015, BS EN ISO 14001: 2015, and ISO 45001:2018. The requirements as specified in the above system are expected of all personnel.

Signed:
